

Maryam Ahmed

Software Developer | Software Engineer | Data Analyst

Bahraini | +973-37766860 | mariamisa5w@gmail.com | [LinkedIn](#) | [GitHub](#)

Profile Summary

Software Developer with practical experience in developing web-based systems, SaaS platforms, and enterprise applications. Passionate about creating efficient, user-focused solutions, with strengths in automation, AI adaptation, and modern best practices.

EXPERIENCE

Batelco by Beyon

- **Industrial Trainee (February 2026 – May 2026)**
 - Implemented database report automation procedures with PL/SQL packages.
 - Designed and tested Linux cron-based scheduling scripts to orchestrate workflow execution.
 - Assisted by developing Reconciliation Automation Dashboard project.

Dimuma Company

- **Part-Time Full Stack Developer (October 2025 – November 2025)**
 - Developed full-stack features using ASP.NET Core web pages, and SQL procedures.
 - Assisted in resolving code conflicts on source control.
 - Supported database design and normalization tasks.
- **Trainee (July 2025 – September 2025)**
 - Collaborated with senior developers to troubleshoot issues.
 - Contributed to testing processes and auditing documentation to ensure alignment.

Arab Financial Company (AFS)

- **Trainee, IT Infrastructure (July 2023 – August 2023)**
 - Prepared documentation of standards & procedures and created infrastructure diagrams.
 - Shadowed senior engineers to gain hands-on exposure to infrastructure operations.

EDUCATION

Bachelor of Information Communication Technology – 3.81/4

Bahrain Polytechnic

(2022 - 2026)

Secondary General Education - Physics and Math – 99.0/100

Jidhafs Secondary Girls School

(2019 - 2022)

CERTIFICATIONS

- **Data Analytics Bootcamp Program – General Assembly (July - Sep 2026)**
- **Think Smart – Soft Skill Development (February 2025)**
- **Microsoft – Power Platform Developer Associate (January 2025)**
- **Kerne - Machine Learning Olympiad 2023 – (March 2023)**
- **Brinc – Batelco Digital Bootcamp (July 2022 – January 2023)**

Completed IT workshops and training; won 1st prize in group hackathon with app idea & design.

- **Alison – Management Information Systems Course (2022)**

SKILLS

Technical Skills	• Programming: Multiple languages and frameworks for web, mobile, and desktop solutions.	
	• Database & Automation: SQL design, PL/SQL, and Linux server workflow automation.	
	• Tools & Platforms: Proficient with IDEs (Visual Studio, VS Code, Xcode), source control (GitHub, Azure DevOps), and platforms such as Oracle SQL Developer, Unity, AWS.	
	• Web Technologies: .NET Framework, ASP.NET, and modern front-end libraries.	
	• Data Analytics: Power BI, Tableau, Excel, and python.	
Soft Skills	• Teamwork & Communication	• Pressure Management & Resilience
	• Adaptability in Diverse Environments	• Time Management & Prioritization

PROJECTS

Automation & Workflow	Billing Reconciliation Automation & Monitoring – Automated reconciliation runs with PL/SQL and Linux cron scheduling, integrated into a monitoring dashboard.
Web Development	LedgerLink – SaaS platform for SMEs in Bahrain, that enables centralized management of multiple stores and records operational data. Built with ReactJS, ASP.NET Core APIs, Azure SQL Database, ASP.NET Identity, Gemini API, EF Core, and HighCharts.
	RentOps – Website for a company to manage operations, developed using ASP.NET Core with an MVC architecture and a class library project for shared models.
	Borrow My Charger – Website providing electric-vehicle charging spots, developed with HTML, CSS, PHP, and JavaScript, and connected to a PhpMyAdmin database.
Desktop Applications	RentOps Desktop Application – .NET Framework Windows application linked to the same database as the RentOps website, used by managers and administrators.
	Happy Journey – .NET Framework Windows application for flight management.

LANGUAGES

Arabic (native)

English (excellent reading, writing and speaking)
